Summary

Final-year Computer Science (Cloud Computing) student and aspiring Full Stack Engineer skilled in Java, Spring Boot, React.js, Python Django, REST APIs, MySQL, PostgreSQL, MongoDB, OCR integration, cloud computing, scalable backend systems, and responsive frontend development.

Technical Skills

Languages: Java, Python, JavaScript, HTML, CSS, SQL

Frontend: React.js, Responsive UI Design, HTML5, CSS3, JavaScript

Backend: Spring Boot, Django, REST APIs, API Integration

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools: Git, GitHub, VS Code ,

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Technologies: OCR, Cloud Computing, Edge/Fog Computing, Machine Learning ,

Education

GM University

B.E in Computer Science (Cloud Computing)

Aug 2023 – Present

Davangere

KLE GH College

Pre-University Education (PCMB)

Jun 2021 – Mar 2023

Karnataka

Work Experience

Cognifyz Technologies

Web Development Intern

Jan 2026 – Feb 2026

Remote

- Worked on frontend development, debugging, and responsive UI design.
- Collaborated using Git/GitHub and improved web responsiveness.
- Worked on real-world software development workflows and frontend optimization tasks.

Full-Stack & AI Project Developer

Academic & Personal Projects

Jan 2025 – Present

India

- Built full-stack applications using Java, Spring Boot, React.js, Django, and databases.
- Implemented CRUD systems, dashboards, authentication, OCR workflows, REST APIs, and API integration.
- Worked on scalable frontend-backend architecture and real-world project development concepts.

Projects

AI-Powered Drug Understanding System

2026

Built healthcare platform using Java, Django, OCR, React.js, and REST APIs with medicine scanning, multilingual assistance, and drug interaction analysis.

Hostel Management System

2026

Developed full-stack hostel ERP using Spring Boot, React.js, MySQL, and API integration with attendance, analytics, fees, complaints, and room allocation modules.

Music Recommendation System

2025

Worked on ML-based recommendation workflows, frontend design, and personalized music suggestion features using Python.

Blood Donation & Emergency Request System

2025

Developed donor registration and emergency request workflows with database-driven management and backend integration.

Simon Game

2026

Built responsive memory game using HTML, CSS, and JavaScript with animations and interactive gameplay.

Achievements

Smart India Hackathon (SIH) Participant

2025

Developed Smart Automated Dustbin system for intelligent waste management and smart city concepts.

LeetCode Challenges & Weekly Contests

2025

Solved 70+ DSA problems covering arrays, recursion, sorting, linked lists, and problem-solving techniques. Participated in weekly LeetCode contests to improve analytical thinking and competitive programming skills.
